Please find below and/or attached an Office communication concerning this application or proceeding.

## Office Action Summary

Application No.

09/832,863

Applicant(s)

AHUJA ET AL.

Examiner

Ashok B. Patel

Art Unit

2154

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 12 April 2001.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

### Disposition of Claims

- 4) ☒ Claim(s) 1-23 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 1-23 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

### Application Papers

- 9) ☒ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

### Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).  
a) ☐ All b) ☐ Some \* c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

### Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☒ Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)  
Paper No(s)/Mail Date 04/12/01.
- 4) ☐ Interview Summary (PTO-413)  
Paper No(s)/Mail Date. \_\_\_\_\_.
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: \_\_\_\_\_.

### **DETAILED ACTION**

1. Application Number 09/832, 863 was filed on 04/12/2001. Claims 1-23 are subject to examination.

#### ***Claim Objections***

2. Claim 1 is objected to because of the following informalities: "a member customer is provided with more event choice that a non-member customer" the appropriate phrase should be "a member customer is provided with more event choice than a non-member customer. Appropriate correction is required.

#### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless-

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-23 are rejected under 35 U.S.C. 102(e) as being anticipated by Rajan et al. (hereinafter Rajan) (US 6,633, 910)

#### **Referring to claim 1,**

The reference teaches a method for notifying a customer of at least one requested event comprising: providing the customer with access to a notification system (Abstract)

(i) determining a status of the customer as a member customer or a non-member customer of an institution providing the notification system, (ii) generating access data

Art Unit: 2154

for the customer, (col.5, lines 62 thru col.6, lines 11, The reference inherently envelops the claimed element) and

(iii) prompting the customer for the access data;

prompting the customer to select at least one requested event, wherein a member customer is provided with more event choices than a non-member customer;

storing the customer's at least one requested event selection in a first database;

prompting the customer to select at least one method of notification;

storing the customer's at least one method of notification selection in the first database;(col.3, lines 44-53)

prompting the customer to select at least one time for notification;

storing the customer's at least one time for notification selection in the first database; (col.16, lines 8-10," A user may select a specific frequency (i.e. how often the formula of the request is calculated) for each request entered.")

receiving trigger data from at least a second database into the notification system that triggers the at least one requested event;

formulating a notification message that includes information about the at least one requested event; and sending the notification message to the customer via the customer's at least one method of notification at the customer's at least one time for notification. (col.3, lines 44-53 "a gatherer for gathering data changes from one or more Internet sites; a guard for comparing data changes with the condition for notification; and a notification alert system for notifying the subscriber of a change that meets

Art Unit: 2154

the condition for notification.”, and col.16, lines 8-10,” A user may select a specific frequency (i.e. how often the formula of the request is calculated) for each request entered.”)

**Referring to claim 2 and 3,**

The reference teaches the method according to claim 1, further comprising prompting the customer to select a method of payment for using the notification system, and wherein only non-member customers are prompted to select a method of payment for using the notification system. (col.5, lines 62 thru col.6, lines 11, The reference teaches “In the example of a subscriber service, data repository 31 would contain data about individual subscribers to the service of the present invention (user profiles and other user-specific records.” The reference inherently envelops the claimed element)

**Referring to claim 4,**

The method according to claim 1, wherein at least the steps of providing the customer with access to a notification system, prompting the customer to select at least one requested event, prompting the customer to select at least one method of notification, and prompting the customer to select at least one time for notification are performed by a customer service representative. (col.3, lines 44-53, col.16, lines 8-10,” A user may select a specific frequency (i.e. how often the formula of the request is calculated) for each request entered.”)

**Referring to claims 5 and 6,**

The reference teaches the method according to claim 1, wherein the second database contains customer-specific financial account information, and the method according to

Art Unit: 2154

claim 5, wherein the customer is a non-member customer. (col.13, lines 44-51, col.5, lines 62 thru col.6, lines 11, The reference teaches "In the example of a subscriber service, data repository 31 would contain data about individual subscribers to the service of the present invention (user profiles and other user-specific records." The reference inherently envelops the claimed element)

**Referring to claim 7,**

Claim 7 is a claim to a system that carries out the method steps of claim 1. Therefore, claim 7 is rejected for the reasons set forth for claim 1.

**Referring to claim 8,**

The reference teaches system for notifying a customer of at least one requested event comprising: means for generating a customer's financial notification preferences col.13, lines 44 thru col.14, lines 6) which include,

(i) at least one requested event, (ii) a customer's notification method preferences;(col.3, lines 44-53), and

(iii) a customer's time for notification preferences; (col.16, lines 8-10," A user may select a specific frequency (i.e. how often the formula of the request is calculated) for each request entered.")

a database containing the customer's financial notification preferences;

a database containing financial information, wherein the financial information is collected from at least one internal source and at least one external source; (col.13, line 44 thru col.14, line 7, Fig.2, ISP's main server 33 and Internet sources 21-25, Fig.4, "Data aggregation software")

a notification message generator for comparing the at least one requested event with the financial information and generating a notification message when the financial information matches the at least one requested event; a notification gateway for sending the notification message to the customer according to the customer's notification method preferences and time for notification preferences; and a database for generating a notification report at the customer's request, wherein the notification report includes at least data describing each notification message sent to the customer during a customer selected period of time. (col.15, lines 13 thru col.16, line 47, and col.3, lines 44-53 "a gatherer for gathering data changes from one or more Internet sites; a guard for comparing data changes with the condition for notification; and a notification alert system for notifying the subscriber of a change that meets the condition for notification.", and col.16, lines 8-10," A user may select a specific frequency (i.e. how often the formula of the request is calculated) for each request entered.")

**Referring to claim 9,**

The reference teaches the system according to claim 8, wherein the at least one requested event is related to one of the following group consisting of a customer checking account, a customer savings account, a customer financial portfolio, a customer credit card, stock quotes, foreign exchange rates, interest rates, and loans. (col.13, lines 44-63).

**Referring to claim 10,**

The reference teaches the system according to claim 8, wherein the customer's notification method preferences are selected from the following group consisting of

Art Unit: 2154

electronic mail, hypertext mark-up language, pager, mobile phone text messaging, extensible mark-up language, facsimile, short message service, and telephone. (col.16, lines 48-63)

**Referring to claim 11,**

The reference teaches the system according to claim 8, wherein the customer's notification time preferences are selected from the following group consisting of instantaneously, hourly, daily, weekly, and monthly. (col.16, lines 23-37)

**Referring to claims 12 and 20,**

The reference teaches the system according to claim 8, wherein the at least one internal source is a financial institution that is hosting the system. (col.4, lines 35-42, Fig.1, The reference teaches "FIG. 1 is a basic overview of a communication network 9 wherein a data aggregation and tunneling service is hosted and operated according to an embodiment of the present invention. Communication network 9 comprises a data packet network 11, which is the well known Internet in this example, an Internet Service Provider (ISP) 15 (with repository 31 as being the internal source of information), and at least one exemplary wireless data network 13." And by disclosing its use as stated in col.13, lines 44-63, it impliedly teaches its application to a financial institution. The implied teachings taught by the reference relevant of the claimed invention are of a paramount importance regardless of the location of the system.)

**Referring to claims 13 and 21,**

The reference teaches the system according to claim 8, wherein the at least one external source is the Internet. (Fig. 1, element 11)

Art Unit: 2154

**Referring to claims 14 and 22,**

The reference teaches the system according to claim 8, wherein the at least one external source is a financial institution that is not hosting the system. (col.13, lines 64- thru col.14, line 7)

**Referring to claim 15,**

The reference teaches the system according to claim 8, wherein customers are identified in the first database as being either member customers or non-member customers. (col.5, lines 62 thru col.6, lines 11, The reference teaches "In the example of a subscriber service, data repository 31 would contain data about individual subscribers to the service of the present invention (user profiles and other user-specific records."

The reference inherently envelops the claimed element)

**Referring to claim 16,**

The reference teaches the system according to claim 15, wherein the at least one external source is a non-member customer's financial institution. (col.13, lines 64- thru col.14, line 7)

**Referring to claim 17,**

The reference teaches the system according to claim 8, wherein the financial information includes customer's checking account balance, customer's savings account balance, customer's portfolio value, stock quotes, and interest rates. (col.13, lines 44 thru col.14, line7)

**Referring to claim 18,**

The reference teaches the system according to claim 8, wherein the means for

Art Unit: 2154

generating a customer's financial notification preferences includes a customer service representative. (col. 10, lines 10-18) "It will be apparent to one with skill in the art that knowledge workers associated with creating input and output templates may perform their services from anywhere in a connected network without departing from the spirit and scope of the present invention. In one embodiment, input templates are supplied by knowledge workers associated with the service, while output templates are created by knowledge workers that are associated with various network hosting entities.", col. 15, lines 20-27,"In still other embodiments, configuration of the monitoring and notification software of the present invention may be accomplished by a knowledge worker (a customer service representative) employed by the service with configuration performed as a result of a telephone call, e-mail, fax, or other communication with a subscriber.")

**Referring to claim 19,**

The reference teaches the method for formulating an alert message containing financial information for a customer (Abstract) comprising:

storing an alert prompt in a first database of a notification system (Fig.3, element 31) hosted by a financial institution (col.4, lines 35-42, Fig.1, The reference teaches "FIG. 1 is a basic overview of a communication network 9 wherein a data aggregation and tunneling service is hosted and operated according to an embodiment of the present invention. Communication network 9 comprises a data packet network 11, which is the well known Internet in this example, an Internet Service Provider (ISP) 15 (with repository 31 as being the internal source of information), and at least one

Art Unit: 2154

exemplary wireless data network 13." And by disclosing its use as stated in col.13, lines 44-63, it impliedly teaches its application to a financial institution. The implied teachings taught by the reference relevant of the claimed invention are of a paramount importance regardless of the location of the system.), wherein the alert prompt includes,

(i) prompt details,

(ii) a preferred method for notifying the customer of the alert message (col.3, lines 44-53), and

(iii) a preferred time for notifying the customer of the alert message (col.3, lines 54-65); receiving financial information into a second database of the notification system, wherein the incoming financial information is received into the second database from at least one outside source and at least one inside source (Fig.1, elements 33, 21, 23, 25) and further wherein the incoming financial information received from the at least one inside source results from a change in at least one customer account maintained by the host financial institution;

comparing the incoming financial information with the prompt details of the alert prompt in the first database; and

notifying the customer through the preferred method at the preferred time through an alert message when the prompt details match the incoming financial information. (col.15, lines 13 thru col.16, line 47, and col.3, lines 44-53 "a gatherer for gathering data changes from one or more Internet sites; a guard for comparing data changes with the condition for notification; and a notification alert system for notifying the subscriber of a change that meets the condition for notification.", and col.16, lines 8-

Art Unit: 2154

10," A user may select a specific frequency (i.e. how often the formula of the request is calculated) for each request entered.")

**Referring to claim 23,**

The reference teaches a method for notifying a customer of at least one requested event comprising: providing the customer with access to a notification system (Abstract), including,

(i) determining a status of the customer as a member customer or a non-member customer of a host institution providing the notification system, (ii) generating access data for the customer, (col.5, lines 62 thru col.6, lines 11, The reference inherently envelops the claimed element), and

(iii) prompting the customer for the access data;

prompting the customer to select at least one requested event, wherein the member customer is provided with more event choices than the non-member customer;

prompting the customer to select at least one method of notification;(col.3, lines 54-65)

prompting the customer to select at least one time for notification;(col.16, line 8-10)

formulating an alert prompt wherein the alert prompt includes,

(iv) the at least one requested event,

(v) the customer's at least one method of notification, and

(vi) the customer's at least one time for notification; (col.3, lines 44-53)

storing the alert prompt in a first database of the notification system;(Fig.3, element 31)

receiving financial information into a second database of the notification system, wherein the incoming financial information is received into the second database ;(Fig.3, element 31) from at least one outside source and at least one inside source (Fig.1, elements 33, 21, 23, 25), and further wherein the incoming financial information received from the at least one inside source results from a change in at least one customer account maintained by the host institution(col.4, lines 35-42, Fig.1, The reference teaches "FIG. 1 is a basic overview of a communication network 9 wherein a data aggregation and tunneling service is hosted and operated according to an embodiment of the present invention. Communication network 9 comprises a data packet network 11, which is the well known Internet in this example, an Internet Service Provider (ISP) 15 (with repository 31 as being the internal source of information), and at least one exemplary wireless data network 13." And by disclosing its use as stated in col.13, lines 44-63, it impliedly teaches its application to a financial institution. The implied teachings taught by the reference relevant of the claimed invention are of a paramount importance regardless of the location of the system.);

comparing the incoming financial information with the at least one requested event of the alert prompt in the first database; and

sending a notification message to the customer via the customer's at least one method of notification at the customer's at least one time for notification when the at least one requested event matches the incoming financial information. (col.15, lines 13

Art Unit: 2154

thru col.16, line 47, and col.3, lines 44-53 "a gatherer for gathering data changes from one or more Internet sites; a guard for comparing data changes with the condition for notification; and a notification alert system for notifying the subscriber of a change that meets the condition for notification.", and col.16, lines 8-10," A user may select a specific frequency (i.e. how often the formula of the request is calculated) for each request entered.")

### ***Conclusion***

**Examiner's note:** Examiner has cited particular columns and line numbers in the references as applied to the claims above for the convenience of the applicant.

Although the specified citations are representative of the teachings of the art and are applied to the specific limitations within the individual claim, other passages and figures may apply as well. It is respectfully requested from the applicant in preparing responses, to fully consider the references in entirety as potentially teaching all or part of the claimed invention, as well as the context of the passage as taught by the prior art or disclosed by the Examiner.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ashok B. Patel whose telephone number is (571) 272-3972. The examiner can normally be reached on 8:00am-5:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John A Follansbee can be reached on (571) 272-3964. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Art Unit: 2154

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
